

## ISI Judging On Tablet- Referee Notes

Besides acting as Judge 1 for all events, the Panel Referee must also do these additional steps:

- Any skaters that scratch must be removed before the event judging begins. To scratch a skater, **PRESS AND HOLD** the skater's name and a warning box will appear. Once the skater is scratched, *The Edge* will remove their name and update the point range for that event.
  - After Judge 2 and Judge 3 submit their scores, you need to review them. You do this by the TAPPING the tab at the top of your screen.
    1. If any there are any red penalty scores, you must **TAP** to approve – and the box will change color and the penalty is now approved.
    2. If a judge wants to change their score(s) and re-submit it (them) – they may do so at this time.
  - After both judge's scores are reviewed and approved, you must "Finalize Scores" with one of these two options:
    1. Finalize Scores – **POST** – This option will be used as long as no penalties are given.
    2. Finalize Scores – **DON'T POST** – This option must be used if any judge has a penalty or duration issue during the event.
  - After the scores are finalized, press the "Go To Next Event" button to load the next event for all 3 judge tablets.
-
